Frontend: WEB

The screenshot shows a web application interface for a blog. At the top left is the logo 'MyBlog'. At the top right are links for 'New Post', 'Profile', and 'Login / Sign Up'. The main title 'All Blog Posts' is centered above a sub-instruction 'Share your ideas, stories, and thoughts with the world'. A central message box states 'No posts yet. Be the first to write one!'.

Why React is Still a Great Choice

by alpha • 01/11/2025, 10:48:59

From AI-assisted coding to WebAssembly and edge computing, web development is evolving rapidly. Developers must now think in terms of distributed performance and serverless architectures.

AT Backend: MongoDB

The screenshot shows the MongoDB Data Explorer interface. On the left, there's a sidebar titled "Data Explorer PREVIEW" with a search bar and a tree view of clusters: Cluster0, admin, local, sample_mflix, test (which is expanded to show chats, comments, posts, products, students, todos, users), and a "...". The main area shows a navigation path: Cluster0 > test > posts. It has tabs for Documents (2), Aggregations, Schema, Indexes (1), and Validation. A search bar at the top says "Type a query: { field: 'value' } or Generate query". Below it are buttons for ADD DATA, UPDATE, and DELETE. There are 25 documents, page 1 of 2. The "Documents" tab is selected. Two documents are listed:
